## School programme support

Academic institutions are for learning.  
International schools though, are  
academic institutions which  
involve so much more.

They involve learning,  
not just academically  
but experientially.

International schools are communities of staff, support systems, students, parents and families where all are adapting to also live in a country unfamiliar to them; and adjusting to relocating, while learning. **ACCESS can be a part of that system.**

ACCESS started in a school in 1986, when a counselling staff member drew attention to a problem within the community. From there a broad community of nationalities and organisations created ACCESS as a solution. This solution has grown steadily and evolved over time. Today it continues to respond to and support the school communities overcoming the challenges of relocating and living in a new country by providing the tools to effectively and successfully settle in the Netherlands.

### MISSION

ACCESS is an independent not-for-profit organisation serving internationals to settle and live successfully in the Netherlands.

# ACCESS

The ACCESS vision is to provide unique, comprehensive and essential services nationally, through the expertise and experience of its volunteer expatriate community.
